

No-Sew Fleece Blankets

These blankets are fairly easy to put together.

1. Place two pieces of fleece, equal in size together. The fleece layers should be placed wrong side together.
2. Then cut 7 inch square pieces from each corner (cut both pieces of fleece at the same time).
3. To make fringes, cut about 7 inches into the fleece at about 1 inch intervals around all four sides of both layers. Don't worry if it isn't exact. Once it's finished you won't notice any real size differences.
4. Finally knot the fringe pieces together using one strand from the top piece of fleece and the corresponding strand from the bottom fleece. Repeat around the four edges until all fringes are knotted.

Note to our K-4th grade groups: Your blankets will be pre-cut. Also, the entire class will work on one blanket together. Our kindergarteners will share one blanket for all four GIFT sessions.
